Representative Projects

- **Pitney Bowes Developer Portal:** Technical Project management of Pitney Bowes Developer Portal that hosts all API products and their demos, used by enterprise & commercial developers. Built on top of self-service SAAS products. Used by clients like ProStar, Inrix, Weather Analytics, Liberty Mutual etc.

  Results: More than 10 successful global rollouts of new features in a year.

- **Location Intelligence APIs:** Directed global rollouts of new APIs. Managed all phases of the software development lifecycle (SDLC) for more than 20 APIs and onboarding of those APIs onto all systems like developer portal, ARIA, Apigee, GUAM, LHG, Okta. Complete SAAS offering.

  Results: Delivered industry-leading API products that clients like ADT, AirMap, Inrix etc. use for making business decisions based on location intelligence.

- **MapInfo Stratus Connect / Spectrum Spatial Analyst:** Both SAAS and On-Premise. Played role of scrum master and project manager, translated requirements from product owner to technical specifications, designing, developing and leading product development for customers like BrimBank, Flintshire etc.

  Results: Growth in revenue from $50K to $10M as a result of continued successful quarterly releases

- **Unite Booking System:** Led a development team and created roster to provide technical support, defect fixing, priority issues resolution, 24x7 production support and starting and resolving ORT calls.

  Results: Handled peak load at odd hours to provide production support and customer resolutions during peak booking season.

- **Vocalink:** Team leader and individual contributor for development and support of payments engine to process daily, monthly, faster and BACS payments.

  Results: The powerful engine was made capable of processing more than 5 Billion transactions resulting in processing of more than £ 3 Trillion worth of payments

- **Global Reinsurance Platform:** Built a platform from ground up to enable clients like Allianz Re, Swiss Re and Munich Re for reinsurance business.

  Results: Ensured defect-free releases through careful planning, testing and QA efforts.

- **Enterprise Application System:** Played a key role in software development and requirement collection from a Indian government client (Irrigation Department, Uttar Pradesh)
  Results: The B2B and B2C application resulted in less paperwork and faster records processing

Roles and Responsibilities

- API Management in APIGEE - API Proxies, Products, Plans, Developers, Apps, Portals
- Development using Java, J2ee, Struts, Hibernate, Spring, JS, AngularJS, NodeJS
